

Website for Members Club

Intro

Build a solution for board members of a national organisation to promote the organisation and publish minutes from monthly meetings on the internet. Some information will only be able to be accessed by users with the correct permissions.

Objectives

- Build a community/ network of club members
- Share public/ private information with the site members & selected information to prospective members.
- Attract new members to the site.

Main Functionality

- Create a login system for different types of users.
- New members will need to be approved by a board member.
- Admins will need to be able to publish information to the site via a CMS.
- Posts should have a category of public and private. Only members and admin can view private content.
- The site should be prepped for SEO purposes.
- Prospective members will need to be able to request access.
